

Promoting Women's Inclusive and Sustainable Financial Growth Challenges

This session will highlight the importance of financial inclusion of women for shared prosperity and overall inclusive and sustainable development in member countries. The session is facilitated by the members of the Islamic Development Bank's Women Advisory Panel. It provides a unique opportunity to share stories of successful initiatives that have demonstrated innovative approaches that advance the financial inclusion of women.

The event will also examine challenges and address them with experts, and provide a platform to exchange ideas, recommendations and opportunities. An integral part of this learning experience will showcase the Indonesian financial inclusion narrative, through which an international and regional exchange can take place.
